Hi

Let me ask you one question. In spite of giving 100% honest effort & best available treatment to patient, Have you seen patients are not responding to treatment? Think honestly. Mostly answer is yes. This is very common story that doctor know diagnosis & giving best treatment as per guideline but patient is not responding to treatment. In such cases if you find out some new invention in medical field & apply it in treatment which gives fantastic results in patients ....this is call magical formula. We find such magical formula for joint pain....its called Genicular Artery Embolization.

As per one of my favourite writer Morgan Housel, Events which itself is very rare in your life but whenever it occurs it changes your life is called tail event. 2001 earthquake in Gujarat & later on Gujarat riots are **tail events** for Narendra Modiji, as whole country come to know about this person & later on by his wisdom he becomes our prime minister. Finding out Japanese treatment for knee pain called Genicular artery embolization & saving knee joint from knee replacement surgery is tail event for us.

In this conference we are going to share magical formula for knee pain ,frozen shoulder, achilis tendinopathy & many more. All this topics are designed in such a way that it will cover from diagnostic dilemma to treatment solutions. We are also going to share many patient's experience after this treatment.

Money is necessary for day to day life but it can't buy everything. How much importance should be given to money is well described by Morgan Housel in his book "The psychology of money". Another good book on back pain is written by John E Sarno with book title "healing back pain". One can get rid of back pain without any procedure. These two books will be given as a gift to all registered participants.

Over all this conference will be academic feast for everybody. We have shown step by step process of finding your own magical formula & stop referring patient to higher authority.

Enjoy
